

What's In/Out for 2018

We have watched our industry emerge from a lonely place where few understood data management (or cared). We took advantage of regulatory drivers to overcome inertia and establish the governance infrastructure. Now we are standing at the precipice of implementation. Congratulations to you for making EDM a reality. As we do every year, here is our list of trends that are waning and new buzz words that are emerging. The objective has never changed. Please accept our best wishes for a happy holiday season and a prosperous new year.

What's In

Putting Data to Work
Semantic Architecture
Unraveling Complexity
Machine Learning
General Data Protection Regulation
Grounded in Contracts
Managing Incentives
Organizational Alignment
Areas of Commonality
MiFID II
Data Flow
Criticality
Semantic Data Lakes
Governance Formality
Business Process Design
Data Incongruence
Level 2 LEI
Data Inventory
Ken Phelan
Connect the Dots
Logical Meaning
Fit-for-Purpose
Russian Hackers
Operational Roadmap
Information Literacy
Ontology Coagulation
Business Incentives
Axiomatic Representation
Logical Domains
Business Outcomes
Content Engineering
Foundational Building Blocks
Harmonization
Authorized Data Sources
Ecosystem Collaboration

What's Out

Managing Data as an Asset
Technical Debt
Data Forensics
Business Intelligence
Personally Identifiable Information
Mapped to Data Models
Accountability Framework
Tribal Knowledge
Data Leverage
Dodd-Frank
Technical Lineage
Dimensionality
Operational Data Stores
Rogue Operations
Analytics on the Edge
Data Discovery
Relationship Mapping
Applications Directory
Dick Berner
Data Integration
Physical Structure
Intended Use
Counterparty Contagion
Compelling Vision
Business Case
FIBO Master
Data Mandates
Vocabulary of Meaning
Data Boundaries
Data Metrics
Data Architecture
Transformation Processes
Reconciliation
Golden Copies
Business Resistance
